TO THE MEMBERS OF MORI

I wish to thank you for the opportunity to serve as your President for year 1983. It is not the officers of the club that makes a club tick but the membership therefore ... I am asking for your thoughtful support in the coming year, by making as many meetings as possible. Your ideas and thoughts will be welcome. Non members are urged to attend our meetings and consider joining us. Please remember we profess to be the friendliest club in 0 K C, therefore lets practice what we preach.... THE FIRST... MEETING OF 1983 WILL BE A DINNER MEETING AT FURR'S CAFETERIA AT 63rd and McARTHUR AT 6:30 ONNJANUARY 4 1983...everyone is INVITED.....

BOB N5EPV

Secretary's Report.....

Its been a very busy month for MORI.... We wish to thank KD5DL our Vice Pres., KA5CXW WASTAR, KSVVD, WB5PWZ, KA5NVN(& his family)& WASGAM (& his family). Ald of the above toted handies at strategic locations at Scout-O-Rama Nov 16 to assist in communications and find lost kids Also saw N5FM Frank walking through. Take note that the Scouting Officials and the public appreciated our rapid action in finding lost kids (or kids looking for thier parents) No injuries were reported.

No minutes of the December meeting were taken but this secretary attended our great dinner meeting.

The dinner meeting at Dotsons was a great success with some 60 folk in attendance. We noted many smiles during the Yankee Swap where lots of wierd gifts were exchanged. Many gifts were recieved for needy children in addition ..

#### FRED KA5CXW

### NOMINATIONS FOR MORI COMMITTEES

The following folk have been suggested to man the operating committees. Many of the following have not been called but would be logical picks for the committees. Hopefully all will sit close (or at least at the same table January 4 at our dinner meeting.

Public Relations..... KASJUJ, WSPDH, WSOZE, KASNNT, KASDMX

Repeator Committee K5ELL, K5JB, WA5EAI, K5VVZ, WA5GAM, KA5CXW W1GOM

Public Service W1GOM, WASTAR, WB5PWZ, N5EDT, N5BEQ, KD5AW WB5GSZ, KA5ESA, KA5ERZ,K5WUF

ARRL Committee W5HXL, WA5JGU, W5KE, W5JJ

MORI BOARD N5EPV, KD5DL, W5KOZ, KA5CXW, W1GOM, WD5ISS

Comment... We urge others to join one of these groups. Hopefully a chairman and a vic will be chosen at the Manuary dinner meeting.

### CHRYSTELL PREDICTS....

{Editor's note: Every so often the great psychic, Rockbound Chrystell, provides us with his special insights into the future of amateur radio. Here, for the first time anywhere, are his predictions for . KEBPI

"I PREDICT that for the first half of 1983 all of the major amateur radio magazines will devote much of their time and space on articles about the 30-meter band. 'New' dipoles will be invented ... many conversions to existing equipment...even computer programs for propagation forecasting. The ARRL will not sanction contests involving the new band, but other magazines will.

"I PREDICT that no-code amateur radio will fail. After the FCC announces its notice of proposed rulemaking, amateurs and clubs all over the country will protest, saying that the no-code proposal is, well, un-ham. (Someone will suggest a 900 MHz no-code band, and the FCC will most likely adopt that plan).

"I PREDICT that N5MS will eventually publish his much-anticipated plans for his two-tone decoder.

"I PREDICT that computers will play a much greater role in amateur radio. CORA will even approve for affiliation a computer/ radio club, and ASCII will become more familiar to the 2-meter crowd. The big move, however, will be toward computer-controlled radio stations. Analog won't die yet, but it would behoove hams to study digital techniques and processes.

"I PREDICT that Q. R. Zedd perfect his design for a catwhisker transceiver, and will work DXCC on it in one day, using a dead wristwatch battery for power (however, two QSLs will be slightly less than 5-9 plus).

"I PREDICT that for 1983 the Russians will again refuse to send QSL cards from their Woodpecker station, just as they currently refuse constructive criticism as to the meaning of 'good operating practices.'

"I PREDICT that we won't see an amateur geosynchronous satellite this year, but one is coming.

"FINALLY, I PREDICT that it will, all in all, be a good year for amateur radio. Best wishes to you and yours for the new year."

### Ham Loses License for CB Violation

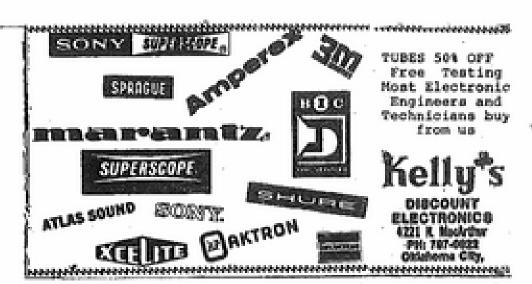

The FCC has re-established the correctness of a legal principle that rules violations committed in one radio service, such as the Citizens Band Radio Service, can form the basis for revocation and suspension of a station and operator license in another radio service, such as the Amateur Radio Service. This ruling came as part of an FCC Memorandum Opinion and Order revoking the station license WD5FPO and suspending the Technician class operator license of William M. Rogers of Oklahoma City, Oklahoma. The Order also affirmed the FCC's denial of Roger's application for an Amateur General class license.

Rogers had been monitored while transmitting on an FAA frequency. He failed
to identify and failed to observe the
required silent periods (CB). Having
previously fined Rogers for violations
in the CB Service, the FCC was uncertain
if CB or amateur equipment were used in
his latest Rules infractions. It issued
Rogers alternative Notices of Violation.

The controversy over the legal principles involved came about when the administrative law judge hearing Rogers' case found that Rogers' violation of CB Rules in 1975 and 1978 "affected his qualifications to remain a licensee." The administrative law judge revoked Rogers' Amateur licenses and denied his application for a General class operator license. Rogers appealed the decision to the FCC Review Board. The Review Board reversed the administrative law judge's decision, and the FCC's Private Radio Bureau appealed to the Commissioners.

The Commission's Memorandum Opinion and Order specifically overruled the Review Board on two important issues. First, the Commission held that Section 303(m) of the Communications Act "means what it says -- that the Commission can suspend the license of any operator upon proof sufficient to satisfy it that the holder of that license has violated any provision of the Communications Act or any regulation made pursuant to the Act." Second, the Commission held that "the grant of a license renewal does not preclude a later revocation proceeding based upon rules violations that occurred, and were known to the Commission investigators prior to license renewal."

### MINUTES OF NOVEMBER MEETING

Meeting was called to order at 8:00 PM by President Steve, W5VCJ, with 10 members and guests present. October meeting minutes were approved as published. Treasurer Eliard, W5KE, gave his report, which was approved.

Bill, WA5FWD, read the proposed amendment to the by-laws and it was approved unanimously.

Motion was passed that the December meeting be a Christmas party; not a regular meeting.

A motion setting dues and related membership conditions for next year was passed. It provided that:

a, 1983 dues are \$6.00.

New members (never before a member) are

to be pro-rated quarterly.

c Additional members in the same household are eligible for "family membership" at \$2.00. They will be listed in CORA roster but will not receive a copy of Collector and Emitter.

The December Christmas party meeting will be Friday December 17, 8:00 PM at the Red Cross. Members will bring snacking type food for the party and non perishable type food which can be given to a needy family. Beacuse of C&E timing, this information will be passed by word of mouth to members who were not at the meeting. For the Secretary, Bob, W5HXL

### YAESU TALKIE MEETS MOTOROLA MIKE

...Microphone, that is, not like in N5MS.

At the request of Stan, WB5UIY, I did a little research of the files on the silly gadget category, and came up with some old notes on a microphone conversion I had made for the Yaesu FT-207 2 meter talkie some time ago. Recently I had verified that the microphone circuit of the FT-708R 450 MHz radio was the same, at least as far as my modification needed to know. Since Stan was interested, I thought someone else might be also, so here it is.

The microphone we are interested in is the little speaker-mike often seen connected to the Motorola portables known in the biz as handle-talkies. Sometimes, if one is lucky enough to go to such places, they can be found in better grade flea markets with price tags of less than \$10. They have a speaker with 39 ohms impedance and a microphone with about 500 ohms impedance. It is a magnetic element. There are two general designs. The earlier one has no microphone and it should be avoided. Look in the center of the speaker grille for a little square area about 1/2 inch wide by 3/8 inch high that hides a black perforated metal grille over the microphone.

Among the later designs there are some variations. There are two types: remote and universal. The remote is used on a radio that has no internal speaker or microphone and can be recognized by its method of attachment to the radio. There is a phillips head screw on the plug that is used to more or less permanently attach it to the radio. The universal is designed to be easily attached to the radio, which has its own speaker and microphone. The plug has a knurled knob rather than the phillips head screw. The universal speakermike is a little more desirable since there is a 50/50 chance you won't have to change the cord to use it on Jap gear.

None of the remote speaker-mikes have shielded cords (as far as 1 know). RF is kept out of the radios with chokes and bypass capacitors. It is far easier to change the cord to a

shielded one than to add the necessary parts inside the radio. Some of the universal speaker-mikes (ones with straight cords) have shields. The coiled cords are unshielded, as far as I know. Unless you think you would like the straight cord, you will need to find a replacement, shielded coiled cord that is small and flexible.

There are a couple of ways to wire the thing up depending on the number of wires available in the cord but first let's talk about the radio. As most people know, there is a screwey design that could cause a lot of grief if it is not recognized. Figure 1 shows the key parts of the audio output circuitry and the mike input, and how they appear on the external mike socket.

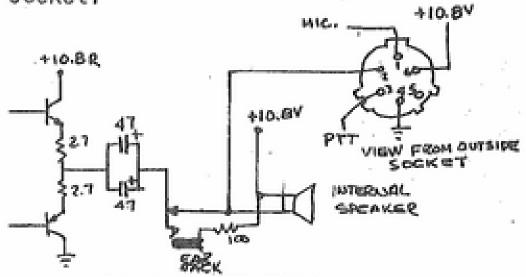

Figure 1 FT-708R Audio

Probably to power an external electret mike element, the designers supplied the B+ to the socket. So far so good. But, for some unknown reason, they expected the ground return for the speaker to be referenced to this B+ rather than ground, and polarized the DC blocking capacitor as shown in figure 1. Plugging a speaker-microphone from another manufacturer, say Tempo, could cause both the speaker coils in the radio and in the outboard speaker to turn to smoke.

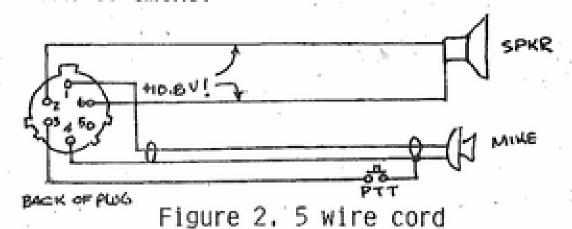

Figure 2 shows a method for wiring the Motorola speaker-mike if a cord having three wires
plus one shielded (5-wire?) is available. It
is the simplest in terms of the interior of
the speaker-mike. Figure 3 shows what can be
done if only 2 wires plus the shielded mike
lead are available. Ideally either job would
be safer from an rf inteference standpoint
if all the wires would be contained in the
shield. The cord I used happened to have this
configuration.

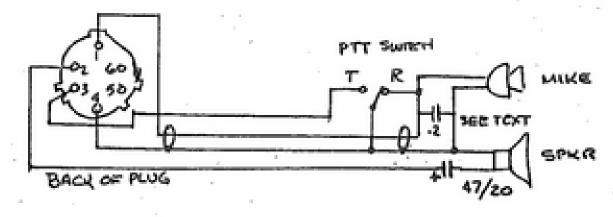

Figure 3, 4 wire cord

Some of the Motorola speaker microphones have the capacitors shown in figure 3, plus some other parts which are not needed for this project. There may be a couple of 27uf capacitors in parallel rather than the 47uF shown. The 2 uF capacitor is a couple of .1 uF, 50 volt jobs I added to trim the high frequency response of my particular element, which I think was faulty. They may not be necessary in all cases. Note that there is sufficient audio present from the magnetic element to drive the rig. Because of its low impedance, it does cut the sensitivity of the internal mike, which is really no problem. The internal mike is cut off when the external PTI is active.

Joe, K5JB

The Shawnee Amateur Radio Club was asked by Ron KA5CAY, Pottawatomie County Civil Defense Director, to assist in a drill for City and County government offices. The drill was a simulated Chemical spill. The Amateurs assisted by keeping Ron informed from the hospitals and areas that would be evacuated. Assisting in the drill were Tommy W5NMN, Ray W5LXH, Walt KA5FIT, and Earl WB5ZBA.

The club meeting followed the drill. Election of officers was the main order of business. Jay KD5NX will be the club President for 83. David N5CGZ will assist as Vice President and Herb W5TQZ will be our new Secretary-Treasurer. The new technical committee will be Tommy W5NMN, Ray W5LXH, Bub W5GYX, Herb W5TQZ, and Bryan WA5RDG. Herb was the only new addition to the committee.

After the election of officers some of the City and State officials that had helped with the drill visited the meeting and a discussion of the drill followed.

Some of the club members have visited Bethel school and their station and have operated the rig there for the class. Jim KA5FBC and Bob K5LZF operated one day and Olive WB5RAY and Bob K5LZF operated the next day. Mrs. Gaines and all of her science class were able to talk on the new Icom rig.

As president of the Shawnee Club for the past year I would like to say how very much I have enjoyed the office. All have worked together very well and much has been accomplished. I hope the club will support the new officers in the same manner.

Jim KA5FBC has served for two years as secretary-treasurer for the club. Good job Jim.

Just a reminder to club members. A new year will be starting soon. The club finances have held up very good the past year. It would be a big help to the new officers if dues would come in as soon as possible. I am sure the new officers have plans and projects for the new year.

73's and be nice to one another.

### Earl WB5ZBA

CHESS PLAYERS! Chess & Amateur Radio International - CARI - is for you. CARI has one purpose, to make chess playing by ham radio readily available to anyone. anytime. For details write CARI, "-> P.O. Box 682, Cologne, N.J. 08213.

A COMPUTER FOR CHRISTMAS??? Why settle for a "toy" computer when you can get a powerful 32K COMMODORE 'PET' for \$495. This versatile unit includes video monitor (no extra TV to buy) and tape drive for program storage. Many manuals, books and software information included in the low, low price. This is a \$1200 computer which is capable of word processing, business applications, games or any similar function. Programs are locally available as well as mail-order.

Call GEORGE ADKINS---- Days-947-0511; Nites-722-6195.

FOR SALE: Many feet of 72-ohm transmitting twin-lead; it'll handle a kW with ease. Just the thing for those whose superstitions forbid feeding balanced antennas with unbalanced feed lines! W5JJ, 789-3788.

STOLEN: Yeasu FT 227R FM Transceiver SN-8DC60148, November 28, 1982 from Randy Williams, WB5CNM, Phone 942-8938 if you find this rig.

PAY MILLER, W5REC

ASSISTANT SECTION COMMUNICATION MANAGER

Well, either I or the "U.S. Mule" was late for the last edition! Sorry about that. I'll try to catch up. The OK Section has a lot of wonderful things about it that makes me very thankful. I spent Thanksgiving thinking about such people as Joe, WASZNF with his devotion to this publication, to the Clubs and their service in their communities, the Nets and their many operators, the "blood, sweat and tears" from Special Events to the several Hamfests, the "Elmers" and all of their training, the people in the middle of the night that are honing on the Repeaters for us to use daily and the high technologists dedicated to their experimentation.

How is the SCN selection coming? About on track. The eyeball contacts at Texoma have been completed, the announcements on all the Section—wide nets have been made and a Memorandum of Record has been issued to all the Affiliated Clubs. I expect all of the Club business meetings to be completed in December and my response to their recommendation made by mid January. My recommendation will probably go forward to the Director in the first part of February. At the present time there are three who wish to be considered. They are: \mathfrak{W1GOM, \mathfrak{W5QMJ} and AD1S.}

Christmas is 'acoming!!! My prayer is that I don't get what I don't want!!!!

### EMERGENCY COMMUNICATIONS ADVISORY COMMITTEE

When Ray Wangler recently appointed me as the West Gulf Division representative to the Emergency Communications Advisory Committee (ECAC), I was both pleased and excited. Emergency communications is an aspect of Amateur Radio about which I have very strong convictions.

Our hobby is changing daily with the advent of state-of-the-art microprocessor based equipment, new modes and new people. One thing that is not changing is our mandate given in Part 97. It is mentioned as the first principle under "Basis and Purpose," the following: "(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communications service, particularly with respect to providing emergency communications." In order to help emergency communications stay abreast of the changes, I INTEND TO PUT MY IDEAS AND THOSE OF THE MEMBERSHIP TO THE ECAC.

I am interested and want to hear the ideas of you -- the SEC's, DEC's, EC's and the general membership. Among other items being considered by the ECAC is, how to improve the Simulated Emergency Test. Send your ideas and thoughts to me about these or any other topics concerning emergency communications.

You can find me on the Texas Traffic Net on 3.961 MHz daily or write to me at the following address:

Roger Coday, N5FN Rt 4, 213 Ave G Brazoria TX 77422

### INTERPLANETARY QSO-JOHN KRAUS STYLE (Or I Know You're Out There, But Where?)

The comments I wrote a couple of months ago after having the opportunity to talk to John Kraus W8JK started me thinking about his active interest in the search for extra-terrestrial intelligence. While designing antennas and other things, John has maintained an active interest in the organized Search for Extra-Terrestrial Intelligence (SETI) for some time as he mentions in his book, The Big Ear. This is not a novel ideal as history has pointed out numerous persons who have wondered whether or not we are alone, but the first scientific appraisal of the Search (capital S) came over 20 years ago in the September 19, 1959 issue of Nature, the science magazine. Giuseppe Cocconi and Philip Morrison wrote the article and detailed some of the first thoughts about an organized search. I will mention a couple of their suggestions later (they first suggested electromagnetic waves as the most logical medium and suggested a frequency related to the hydrogen atom).

The first thoughts in a scientific evaluation revolve around these ideals: (1) Planet formation; (2) origin of life; (3) evolution of societies possessing advanced scientific capability. Since there are no reliable theories regarding the existence of societies possessing advanced scientific capability on other planets, we can only surmise their existence from the extremely large numbers involved, that indeed, we are not alone and life on other planets does exist. Statistically, our sample of known intelligent life (we hope) is quite small (the sample of known life is very small, that is, the earth is our only known example). You can't put a statistical test to it, but complemplate the following numbers:

- Stars have planets (at least one star does, the sun).
- Galaxies are composed of stars.
- Our Galaxy (The Milky Way) is a flat disc (100,000 light years in diameter).
- Our Galaxy turns around once in 300 million years.
- The earth is located 2/3 of the way to the edge of our galaxy in one of the spiral arms of the Milky Way.
- 6. A sphere 1000 light years in radius occupies a very small part of our galaxy (0.01 of 1%) (One light year equals the distance light travels in one year or 300,000 kilometers times the number of seconds in a year or about 10<sup>13</sup> kilometer, a definite fur piece).
- There are about 100,000 million (10<sup>11</sup>) stars in our galaxy.
- 8. There are about 100,000 million (10<sup>11</sup>) galaxies in the universe.
- 9. Therefore there are 10,000 million million  $(10^{22})$  stars in the universe.
- 10. Within 1000 light years (remember, a small-distance) of the sun there are about 1 million stars in age, size and composition to our sun and many may have planets.

Just within the neighborhood (1000 light years), there are a million potential suns with who knows how many planets similiar to ours. Remember that these numbers

get bigger and extremely so when we start thinking about other places than our universe. From the shear large size of the numbers, there is more than ample opportunity to contemplate that someplace, somewhere there is probably a mustachioed, slightly pudgy (all right, make that a little pudgy) and balding amateur radio operator typing the exact words that I am typing and he aint me. After all, when you start multiplying by 10<sup>22</sup>, the odds of such an occurrence go up fast.

I draw these numbers from an article that John Kraus wrote in Cosmic Search, the first magazine published about organized SETI, and the appendix to his Book, The Big Ear. The essence is that E.T. stands a fairly good probably of existing somewhere in the universe. The fact that they may be over 1000 light years away only means that Break-in CW will not be necessary in any communications scheme.

A rather oblique effort was made to communicate (though it was more symbolic than expectant) was the ceremony made to mark the inauguration of the newly surfaced dish of the giant antenna at Arecibo, Puerto Rico on November 12, 1974. A radio message was directed toward Messier 13, a globular cluster of stars in which, it was thought, had the best probablity of containing a viable civilization. They are not exactly in the neighborhood, being a mere stone's throw of 24,000 light years away, but it shows that someone was thinking. Actually, Arecibo is an interplanetary communications device of the first quality (slightly more complicated than a Speak and Spell and an umbrella) and is capable of communicating with another facility of similiar quality anywhere in our Galaxy.

John Kraus has led the charge for quite some time in SETI. He was an initial coeditor of Cosmic Search and built two radio telescopes at Ohio State University including "Big Ear." But we are not dealing with a bunch of crackpots. The editorial board of the magazine included such intellectuals as Norman Cousins, former editor of Saturday Review, Theodore Hesburgh, President of Notre Dame, and Carl Sagan. There are many other respectable scientists who share JK's interest. While the work with the "Big Ear" is rather mundane, mapping the sources of radio noise in the sky, it is vitally important to the "light" astronomers. And incidental to that work is the search for ETI.

Well, if we are going to either talk or listen to these, uh, ah, beings, what form would the communications take? Back to the article in Nature by Cocconi and Morrison, we find a rather intelligent discussion that any such communications will take place withelectromagnetic waves. The dispersion and distances involved virtually eliminate the possibility of using light (although it has been suggested that super intelligent life might completely cover a star, harness its energy and let light escape in a regular fashion for the purpose of communication).

If we assume that electromagnetic radiation is the choice of communications medium of the intelligent and discriminating ETI, what frequency would he choose? Well, there are a few criteria. The frequency chosen must not be highly attenuated in the atmosphere or in the vacuum of space. The signal frequency must stand out against the background noise of the galaxy and beyond (got to get that signal to noise ratio up by lowering the noise floor). It was suggested in the Nature article that the frequency chosen have some relationship to the natural elements found in the universe. The chart on the next page is from the 1966 edition of John Kraus' book "Radio Astronomy" and points out a few important factors in selecting a frequency for an interplanetary QSO.

The most abundant element in the universe is Hydrogen (H). It emits a natural radio signal, called the Hydrogen line, at a wavelength of 21 centimeters (for those of you too slow to reach for your slide rules, that

### SKY NOISE DIAGRAM

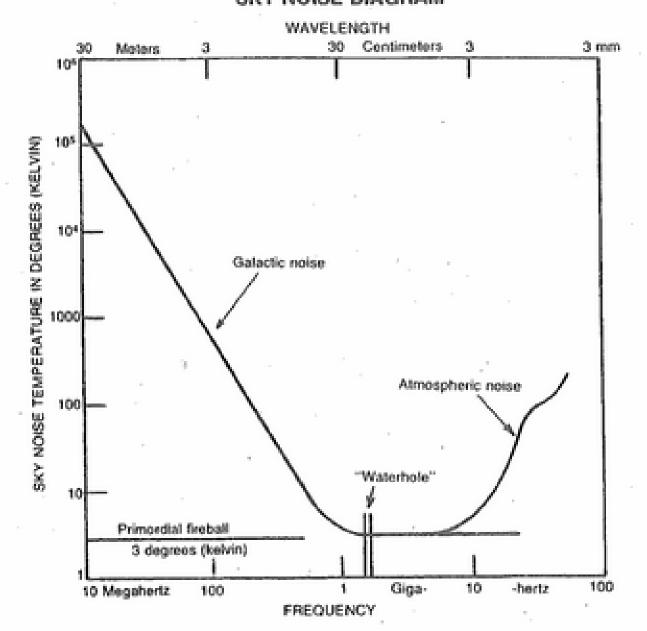

Figure 1. Sky Noise Diagram from J. D. Kraus "Radio Astronomy, McGraw Hill, 1966.

corresponds to a frequency of 1420 Megahertz. It is suggested that intelligent life will be aware of this hydrogen radiation and if they, like us, chose to attract attention to themselves with a beacon signal, they might well chose the same wavelength or one close to it (taking into account the doppler shift that occurs as planets move in relative motion to each other and the corresponding frequency shifts that would occur as a result of such shifts). The Hydrogen frequency is also near a minimum of the background noise from the galaxy and is relatively free of absorption by the interstellar medium, by our earth's atmosphere and by probable atmosphere's of other planets.

Kraus has also pointed out that there is a natural emission from the hydroxyl (OH) radical at 18 centimeters and as every school boy knows, hydrogen plus hydroxyl produces water. The wavelength region between 18 (for OH) and 21 (for H) is frequently referred to as the "waterhole" by radio astronomers, an oblique reference that perhaps galactic civilizations might gather around this group of frequencies to "chat" much like the different species of animals gather around an African waterhole to drink. The use of the waterhole to conduct SETI searches is only a guess, but it is an intelligent guess based upon different factors. We must also assume that any ETI life that we come in contact with is also imbued by similiar logic.

Galaxy and is known as the "Drake Equation." These numbers are reasonable, but as previously indicated, entirely speculative. Your numbers, if you chose to do so, may be just as useful. The equation details 7 factors involved with ETI and I quote from Kraus' article in the inaugural issue of Cosmic Search (January 1979).

"Suppose you guessed that stars in our galaxy, form at the rate of one per year (probably not a bad estimate), that 1/5 of the stars have planets (no one knows), that there are 2 planets with stable environments (a guess), that life appears on each (fraction = 1), that intelligence emerges on each of these (again, fraction = 1), that 1/10 of these develop communications capability and that these remain in this state for 1000 years. Then, it works out that the number is 40 (as below).

According to this estimate, there would be 40 civilizations in our galaxy capable of communication, or about one per trillion (10<sup>12</sup>) cubic light years so that the nearest one might be something like 10,000 light years away. However, if it is in a communicative mode for only 1000 years, as assumed, it will be extinct long before its signals are received at the earth. The longevity time (last factor) is very uncertain. Is it 10 years or one million? In this example we have assumed 1000 years.

Now, you play the SETI game by writing down your numbers. Who knows? Your result may be the right one."

Dr Kraus is quite right in suggesting that anybody's numbers may be better than the ones he proposed. The fact is that our known sample is so small (the earth) that the numbers become very uncertain. Any mathematician worth his postulates will tell you that errors in assumptions have a tendency to multiply to larger errors.

Assuming that we do find ETI, what will they tell us? Dr. Kraus has suggested that they be long dead before the information that they sent reaches us. So what value is this? Well, perhaps not as useful as a genuine ragchew, but 10,000 years is a long time to wait between exchanges anyway. There should be no reason why we could not learn from the information they provide us just like we have learned from the romans or greeks or any other ancient civilization. These are other forms of one way communications that have benefited us to a great extent. The problem will be in receipt and decoding of that message or for that matter, even recognizing the information as anything other than random noise. These issues must be confronted even before we begin to think about meaningful exchanges. And before we even get that far, we must contemplate which direction to point that dish and at what time. All important

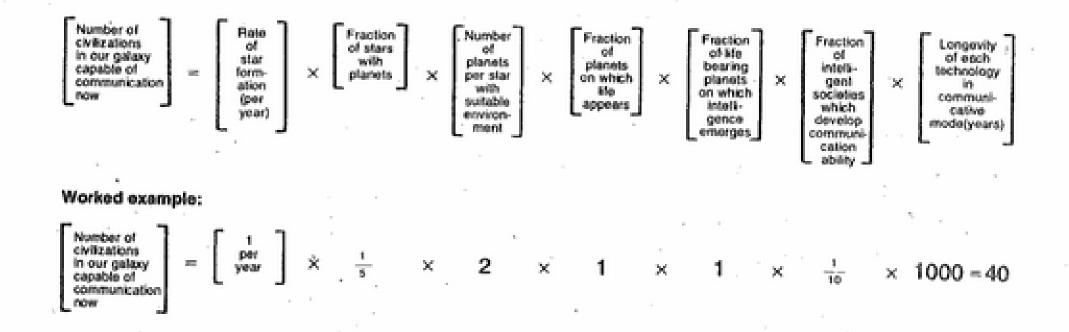

Figure 2. Drake's Equation for the determination of ETI civilizations

Now, down to the bottom line. What is the probability and potential numbers involved in determining the existence of ETI in our galaxy. Figure 2 shows the the suggested relationship between ETI and our

and relevant factors. Regardless, especially around Christmas, there is no reason not to assume, as many have since the first Christmas, that there is not intelligent life around other than ourselves.

### W6SD CARRIER EDITOR EDITORIAL REBUTTAL !!

One thing that I enjoy about being an ink-stained wretch for the C & E is that I occasionally get an extra letter or two from other similiar correspondents around the country who have occasion to read the drivel published under my byline. I think that I stepped on a nerve out in California and received the following humorous editorial reply from Rosemary Willis, editor of the W6SD CARRIER. For the longest time, I have been able to successfully hide from these replies since I used my parents address on my linense and there is a considerable lag to get the correspondence. Those of you who do have a need to let me know something can write me at 2215 West Lindsey, Suite 112, Norman, Oklahoma 73069. Anyway, Rosemary writes:

Dear Micheal (Got the name right! Good Show!):

I read with interest you "tongue-in-cheek" (I hope!) comments on the various club papers.

I have been Editor of the "W6SD CARRIER" for more years than I care to remember, even though I don't have a ham license, the San Fernando Valley ARC has seen fit to give me honorary membership in order to make me a member so I would quit hiding behind my husbands's call (W6LPJ, Archie) which I did the first few years, and now they refer to me as the "Den Mother" (I still haven't learned the code so I can get a license, self defense maybe, but thats another subject.)

Your comment about the name "CARRIER" is well taken, but as with other Bulletins, it is an old established name which goes back too many years to change, the (enclosed) Nov. '82 issue is part of Volume 24.

I am sure the call sign the club was issued was an example of FCC roulette alright, probably applied for after WWII. By the way, the San Antonio, Texas ARC has the call W5SD, wouldn't that be better if it was W5SA?? Actually, it was very, very recently when you (I am sure that is how you got your initials) could pick your call sign. Our club would rather have had the call w6 IN, but he wasn't a silent key yet (Ed. Note, Greater love hath no ham for his radio club), W6IN was also W2IN, one of the founders of QCWA, now another San Fernando, CA club is the "WeIN Society", we found that a club can't have two Call Signs so George Drosti's call was requested and given to the San Fernando group. We have a "Silver Dollar" Award, and our club is proud of the WESD, as Tam sure are the other clubs are who's calls really do not mean anything quite as prestigous as W6TRW does!!

I like your articles even though I do not understand the technical ones very well, I read the C & E articles with your name on them just to get the bits and pieces of your Hamfest travels and your trips to the OU games. My husband and I are FANactics of the L.A. Dodgers (a baseball team) and we understand the fanaticism of the true Fan.

We have good friends in and around Oklahoma City, although both of us grew up in Amarillow, Texas (I know, boo-hiss..) and a couple of years ago we made the mistake of taking a 3 week trip to Arkansas, where Archie's parents and siblings now live, in September!! We tried to follow the Baseball scores in Arkansas, forget it!! And when we started home, we stopped overnight near O.C. to visit a friend and thought oh wow, now we will get a Big CITY TV Sports News and at least find out what the baseball standins are... we watched a sports news (program) for 28 minutes with every football score for every college game in the nation, and then every score for every high school football game within 200 miles of Oklahoma City, and they

finally spent about 30 seconds on the scores of the major league baseball games and since the Dodgers were still playing (at home it was only about 8 p.m.) we never did find out what they were doing, we had to wait till we got home to find out they were almost world champions!! Archie went through the same thing recently when he visited Ark., only this time the news came out of Little Rock, we follow football but are not FANatics about it!!

Keep up the good work,

Rosemary Willis

Well, thanks a lot, Rosemary. Whenever I hear the name San Fernando, I alway wait, expecting someone to begin talking about "Rich corithian leather and the Chrysler Cordoba." Sorry about the football scores, but that is life in the Big City. You must either not travel to Arkansas in September or accept my suggestion to follow. I do remember, however, a comment that Abe Lemmon, former basketball coach at OCU (Oklahoma City University) and Texas who lamented that during "Football season all everybody does is sit around and talk about football season, and the rest of the year, they sit around and wait for football season to start.

Rosemary, I do have a suggestion to minimize this communications breakdown (and this may be the reason that poor Archie had to travel to Arkansas by himself this year). In my mind, you could kill two birds with one stone if you would get your amateur license and convince Archie to pack an IC-730 or TS-130 along for the trip. You could then arrange a QSO with one of the local fanatics back home and get all the latest scores.

I put together a collection of items that fit into two small suitcases that contain a complete station right down to the tent spikes for tying down the ends of the antennas. This includes a TS-130, a Hygain tape dipole, a 4 amphour nicad sealed battery and an 8 amp power supply/charger. I also have strings and cables. When I went to my parents house for Christmas this past month, I talked K5JB into going with me and we carted the two cases along for a chat with WB5FZD (traveling to Loveland, Colo), KA5OHU (going to Ponca City) and WA5JXX (he stayed in Norman). The first plan was to meet on Thursday morning around 7170 Khz or so. Roger, John and I made the contact and the conditions were pretty good. John claimed he heard Tim in Ponca City on CW (7145 Khz), but Tim later told me no. I think that it was the thin mountain air that got to John. We were suppose to meet the next day, but I found the band peculiarly dead when I got up and I found that my cable feedline to the antenna had pulled out of the Hygain dipole. A simple fix, it is not to reassemble a Type N connector with a pair of pliars and a toothpick. I came back to Norman the next day and met Tim on CW and we chatted back and forth for awhile and then John came up.

So, Rosemary, I suggest that the Dodgers and you and Archie can remain simpatico with amateur radio. Fire up the portable rig and get the scores direct from the west coast. You are, of course, invited to submit additional editorial material to the C & E. Please don't wait until I insult the Carrier again.

Micheal Salem N5MS

### TOUCHTONE DECODER BOARDS ARRIVE!!

After a couple of false starts with a local supplier, I have finally received some boards from a PC house in Tulsa for the Touchtone decoder in the August 1982 issue of the C & E. I have about 10 left or so and they are first come, first serve. Call me at 360-1302 or 321-5453. The boards are great looking.

Micheal Salem NBMS

### A WIRETAP IN TIME SAVES NINE (or "What else did you hear, Justice Douglas?")

While looking around the local chain bookstore bargain table the other day, I found a copy of William O. Douglas' book, "The Court Years" detailing his impressions of his over 36 years as a Justice of the Supreme Court of the United States. I bought the book and started reading it. It is a fascinating collection of stories by this most controversial man. The book does tend to bog down in quotations of various legal opinions, but Douglas wrote this book to detail various legal as well as political events that occurred during his tenure.

This is an amateur magazine, not the New York Review of Books, but I found a reference on page 256 of the book that was very interesting. The Court's decisions on wiretapping had a very profound effect on law enforcement as well as for the common citizen. Douglas viewpoint had alway been that such taps were illegal, yet common place. Several times in the book, he suggests his certainty that various phone conversations, or even the main conference room of the Supreme Court were bugged. To bolster this opinion, on page 256 he detailed how he knew:

Telephone wires in Washington are commonly tapped; and I have at various times been morally certain that all Supreme Court wires were tapped. In the early days it was easy to recognize a "tap" by a recurring beep-beep sound. Later more sophisticated methods were used, even the most suspicious telephone users were not aware of what was happening.

It is interesting to note that a Justice of the Supreme Court believed that the widespread use of wiretaps was a common occurrence. It is even more interesting that he could detect those taps by a "recurring beep-beep" sound on the telephone. While I would believe the widespread use of taps, I don't really think that any wiretapper worth his salt would announce his presence by a "recurring beep-beep" on the very telephone he intended to tap.

It occurs to me that Justice Douglas was describing a tone used for telephone tests. This is very common. A lineman can isolate a line with a recurring beep-beep much more easily than just listening for tones. The new Bell telephone tone generators are solid state and just about the size of a small match box. For a steady tone, you connect up two wires, for a "recurring beep-beep" two wires are jumpered together. I have played with one of these devices and they are capable of quite a hefty signal into the phone line. I suppose that this would be so that you could still identify the line even though it had a partial short in it. Regardless, when one of these tone generators are connected up, the level is so loud that it is an almost virtual certainty that cross talk is going to occur. I found that these devices could generate almost 2 volts across a 600 ohm load, just about 10 milliwatts or about +10 dbw. This might just be heard in the next room.

I surmise that what happened is that Justice Douglas was setting in his office one day and heard the recurring beep-beep noise. He probably turned to his trusty law clerk and asked what in X?b!\$ was that noise. The clerk, knowing that phone men were in the building (probably having seen them in the hall) told the Justice that people were probably listening on the lines while testing them out. Justice Douglas suspects a wiretap.

I would have agreed with him if he had said that early day taps were detectable by listening for clicks on the line as mechanical connections were made and broken. Taps in the early days consisted of simply listening across the line with another telephone. Lifting and listening to the line might generate a click or two. New equipment does not load the line and probably

is virtually undetectable. What I find very interesting is that determination by Justice Douglas (who apparently had no training in electronics, there not being much use for in the woods, he was a great outdoorsman) that a typical test tone used by phone company personnel would be taken as a wiretap. It is odvious that this feeling manifested itself in the later court decisions holding that wiretaps were illegal even though they made no physical entry into a persons house.

In 1928, eleven years before Justice Douglas went on the Court, the Supreme Court held that a wiretap was not a "search or seizure" within the meaning of the Fourth Amendment:

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

In 1967, the Supreme Court reversed the earlier decision (Olmstead v. United States) in Berger v.

New York, and eventually deciding in Katz v.

United States that the Fourth Amendment protects "people, not places." The Olmstead decision had been decided on the basis that a wiretap did not constitutes a physical invasion of a home and involved no physical object that could be "seized."

The Court felt that it was not its place to write an exclusion of wiretapping into the Fourth Amendment, but in Olmstead invited Congress to pass controlling legislation. Congress responded in 1934 with the now famous Section 605 of the Communications Act of 1934 which provided that "no person not authorized by the sender shall intercept any communication and divulge or publish the contents . . . " It was generally thought that amateur radio transmissions were exempt from that provision until the Reston decision several years ago. The Communications Act Amendments again restores the thinking that amateur transmissions are exempt from Section 605. The point is that there probably is no doubt that Justice Douglas voiced his theory of "wiretapping" to the Court and that probably, they too heard the "recurring beep-beep" in their telephones, and thought that they were taps when they were just servicemen listening around.

Did the Court decide the Berger case outlawing wiretaps on the basis that they didn't want their phones tapped? Did they labor under the erroneous impression that that actually occurred in the Supreme Court? Probably not. Douglas recounts a situation where it was discovered that the Court's conference room was actually bugged and the two employees who discovered it were summarily fired. Chief Justice Warren Burger had the conference room "swepted" by the CIA and FBI, but as Douglas suggested, those probably were the people who would have had a reason to bug the room. In any instance, we know that Douglas apparently was not an expert on wiretapping. It might be too much to suggest that his mistaken impression may have eventually led to the outlawing of wiretaps as each of the Justices perhaps became annoyed at the "taps" in the form of "beep-beeps." thinking that someone was out to listen to their private conversations. Who knows.

Justice Douglas' reference to wiretaps was not unexpected, but interesting in light of what appears to me to be misinformation. Regardless, it probably resulted in a proper decision.

Micheal Salem N5MS

### VICKI GOES NATIVE

Usually we hear the question, "Why in the world did y'all go 'way over there?"

Perhaps some of the photos within this article will (in part) answer those queries...

Vicki and I decided to make the big 'plunge' in February 1982; combining a dream vacation with a DXpedition and a visit to many radio friends with whom we had communicated over the miles and over the years.

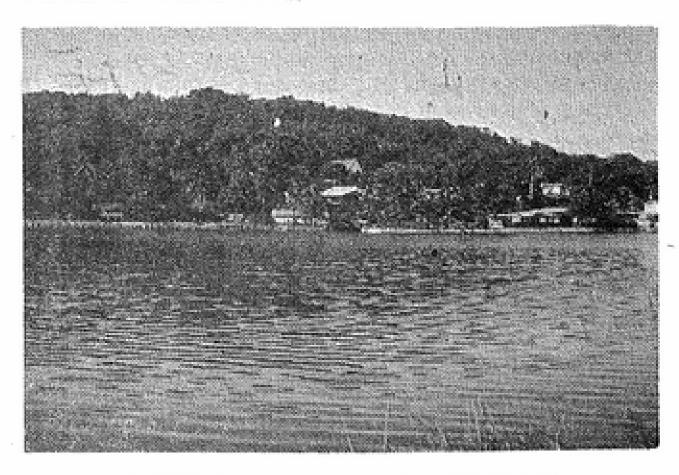

It was a simple task to obtain licenses to operate from the Trust Territory of the Pacific \* Islands...a brief letter brought the proper forms from TT government on Saipan, and in a few weeks we were officially KC6WS from both Eastern and Western Carolines and KX6OS from the Marshall Islands. (We requested KC6ES for operation from the Eastern side, but TT did not see the need...obviously not a DXer.)

It was not so easy to get hotel reservations! It turns out that August is the peak tourist season, and the tourists are all wealthy Japanese! Without the help of our friends in Micronesia, the trip would have floundered for lack of hotel space. The men at U.S.C.G. ORAN Station YAP, KC6DN, KHØAC and KX6OR used their influence to see that we had a place to sleep and operate.

We left Oklahoma City on July 31 boarding an American Airline 747 in Dallas for non-stop to Honolulu...about 8 hours in the air. After recovering for a few days in Hawaii (during a hurricane) we flew AIR Micronesia to Guam, with stops on Johnston Island, Majuro, Kwajelein, Popape and Truk. Twelve hours in the air...if you get the picture. By now Vicki's ears were gone completely!

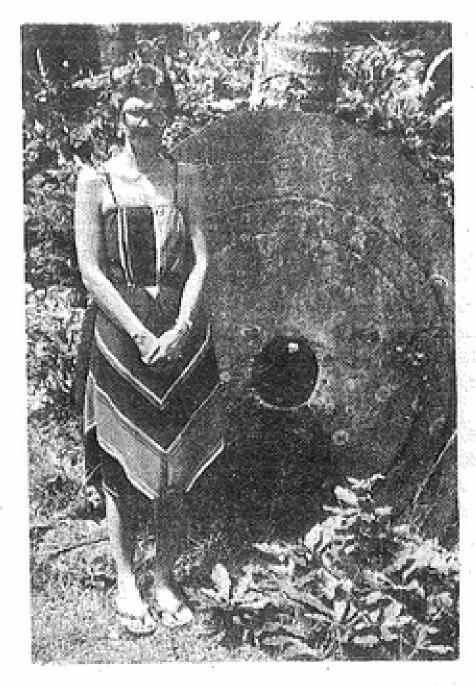

Overnight in Guam at the Pacific Islander Hotel, where we were given a traditional Japanese-style suite. Too bad we were too bushed not to enjoy it!

Up the next morning...August 3, 1982...on Air Micronesia again for a (mercifully) 30 short minute flight to YAP, Federated States of Micronesia.

YAPESE CAPITOL CITY, SITE OF KC6WS QTH.

Our QTH on Yap was the Raiview Hotel, overlooking the peaceful Lagoon in Colonia.
It was hot and humid as we set up KC6WS to
make nearly 3,500 QS0s in four days.
Thanks to the U.S. Navy Seabees for defusing that unexploded bomb resting in the
muddy bank just yards from our hotel room!
We had a few moments to spend exploring the
island, which is famous for its "Stone Money"
from earlier times.

YAP ISLAND STONE MONEY WAS BROUGHT TO ISLAND BY DUGOUT CANOE FROM PALAU, A DISTANCE OF SEVERAL HUNDRED MILES. VICKI, N5DLM SURVEYS A SPECIMEN OF THE NATIVE CURRENCY.

Joe Tamag, owner of the Raiview Hotel treated us royally, giving us 'Room Number 1' best room in the house. Also at our service was our Yapese friend 'Gil' who drove us anywhere we wished to go, helped erect our antennae and even slept near our antenna to prevent them from being 'salvaged' by the aluminum-hungry native boys.

A TRIP TO THE 'STONE MONEY BANK' NEAR COLONIA IS A MUST. GEORGE, AD1S AND YAPESE GUIDE GIL ARE SURROUNDED BY PALM FOREST AND STONE MONEY.

August 8, 1982 and we must say goodbye, "HAFA ADAI" to our friends on Yap as we anxiously await Air Micronesia and another short hop to PALAU, Republic of Belau, Western Caroline Islands.

DXers know that Palau is the only island that comprises KC6-Western Carolines. We expected a real "dog fight from this QSO but were greeted with pitiful propagation of the Summer Doldrums.

The bands were always open to Japan, however, and NSDLM became quite a hit as 'Vicki-San' with the JA operators. We logged over 2,500 QSOs from Palau, but disappointingly few U.S.A. or European openings.

PALAU, HOME OF GIANT CLAMS, BEAUTIFUL ROCK ISLAND GARDENS AND DENSE JUNGLE GROWTH IN A TRULY TROPICAL ATMOSPHERE.

Karl, KC6DN did a superb job arranging for hotel accomodations. We were among the few Caucasians in this Japanese tourist center, but the Nikko Palau Hotel was world-class in every way. The management knew we were 'Ham' operators, gave us a fantastic suite overlooking the 'Rock Island' lagoon and told us to put our antennas anywhere we wished. The Nikko Palau is the former Continental Hotel, recently bought by Japan Air Lines.

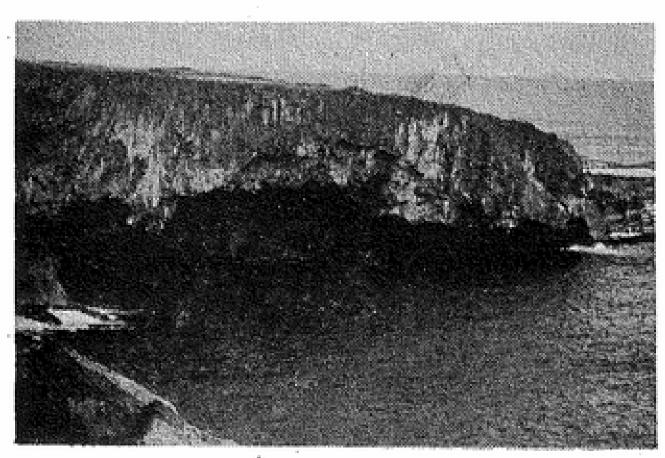

We spent a memorable day with KC6DN and lovely XYL Marion exploring the distant Rock Islands, reefs and sunken war relics. The underwater color is breathtaking.

August 11, 1982 was the date we retired KC6WS (East and West) and boarded Air Micronesia once again, this time heading north across the equator to Saipan, Commonwealth of the Northern Marianas.

One look at our room in Saipan, and we knew we had lucked out again! Len, KHØAC had wangled a fantastic top-floor room at the Hyatt Regency Saipan, and the hotel management even provided a technician to help erect the antennas on the roof just above the room.

Propagation picked up only slightly from this QTH, but we managed 2,200 QSOs in our three day stay, operating as AD1S/KHO.

Saipan is noted for the historic battles which occurred there near the end of World War II. Our visit included trips to the awesome Suicide Cliffs, American landing beaches still littered with the hulls of rusting Sherman tanks and the infamous "Bonsai Cliff."

BONSAI CLIFF WHERE SEVERAL THOUSAND JAP-ANESE SOLDIERS, SAILORS AND CIVILIANS HURLED THEMSELVES INTO THE SEA RATHER THAN SURRENDER TO ALLIED FORCES.

When the bands were dead, we managed to spend some time poolside at the Hyatt Regency. Vicki became quite interested in a Tahitian Dancer who kept smiling at her... She decided we 'MUST' see the Tahitian Dance Show that night in the hotel lounge... I loved it when the dancer jumped over the rail (directly in front of Vicki) and tried to scare the island devil out of us! You had to be there...

August 14, 1982 and we stood at the airport once again with our traveling road
show...Looking forward to about seven
hours flight back toward home and our
last operating stop, Majuro, capitol of
the Marshall Islands.

We arrived after Midnight, Majuro time; jet-lag was beginning to take its toll. Thanks to Brian, KX6OR (ex-KC6DC) we had a room waiting for us at the Eastern Gateway Hotel. Putting things into perspective, there are only about 30 hotel rooms on the entire island, and a British construction company had rented 35 of them on a semi-permanent basis while they were constructing a new power station...We were lucky to have a place to lay our heads...

We fired up that night for a CW-only operation as KX60S. We made only three SSB QSOs from Majuro, all to friends back home. Our net QSO count was a little over 1,100 from Majuro.

Our firmest memory of the Marshalls is the apparent fragility of this island chain. These are true atolls, merely the rim of extinct volcanoes that just happen to stand, ever so slightly, above the water's surface. We could stop our car, at almost any time, and hurl a rock into the ocean AND the lagoon at the same time! (That's small...)

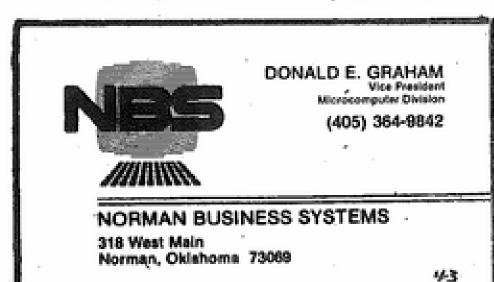

The Marshallese people were the least friendly of all Micronesians that we encountered. Considering the fate of islands like Bikini, Eniwetok and Kwajelein, it is not difficult to understand the animosity toward our government. Still, we were treated with courtesy and kindness.

August 16, 1982 and we pack for the final time in our DXpedition...

It seems like such a brief flight from Majuro to Honolulu International. Just in time to greet another hurricane nearing the Hawaiian Islands. Our 12-hour layover spent sleeping in a rental car on the North beach of Oahu and searching for last minute souveneirs...

The end of a hectic but memory-filled trip. We'll be back, someday. "HAFA ADAI, friends of Micronesia." de ADIS and NSDLM.

FOR SALE: Yaesu synthesized 2mtr talkie Ft-207R + speaker mic. \$225 WA5RPP, Sam Barrett, 321-2601

A four day (nite) Civil Defense workshop was held at the North Main Fire Station here in Altus through the auspices of Oklahoma State Civil Defense.

The four nites of instruction ran from November 15 through 18, 1982. The classes were conducted by mr.

Cliff Conkle and Mr. John Ewing.

The Civil Defense workshop was entitled The Radiological Defense Officer Course. A prerequisite for this course was the successful completion of a two day C.D. workshop called Radiological Monitoring conducted back in September. The two day workshop could be made up by successful completion of a Federal Emergency Management Agency home study course entitled Radiological Monitoring (HS-3).

Attendees at this workshop were: Dwight Dennis, WB5-KRH; Loren Simms, WA5CBF; Paul Mc Endree, WD5BBO; Deanna Mc Endree, WB5UMH; Chuck Smith, WB5MJS; Linda Smith; and John Lemen from Altus Air Force Base

and John Lemen from Altus Air Force Base.

A warm welcome to Captain Ed Smith, WA4ODJ, and family to Altus. Ed and his wife, Carol has two daughters by the name of Sheryl and Amy.

Ed comes to us from California where he was stationed at Travis Air Force Base. He is an Instructor Pilot for the University of MAC, Altus Air Force Base.

Ed secured his Ham ticket in 1968. His current hobby is personal computers. He has had four years of experience dealing with them. Ed has a Radio Shack TRS-80 Model I with expansion interface, Epson MX-80 printer, and three double sided disk drives.

We are all looking forward to visiting with him in

the years to come.

The following is a list of calls and club dues dates:

WBØWCB,83-04; W5VQS,83-03; KA5MPK,83-01; W5UVX,83-10; WB5KRH,83-09; KA6RTX,84-01; WB5UMH,82-12; WA5TXG,83-04; K9PNT,83-09; K5KCJ,83-08; WB5UMH,83-03; KB5LS,83-09; KA5KVU, 83-12; W5VXU,83-01; WA5CBF,84-01; WB5MJS,83-08; WB5KPM,84-12; N5DKZ,83-12; N5EST,83-02; KA5NQS,83-02; N5AIP,83-12; WD5BBV,83-02; W5CCV,83-11; N5EOZ,83-10; W5ZDI,84-01; WA5OGC,83-01; K7BSY,83-04; WB5LCM,83-09; WA5MCS,83-06; W5UOV,83-05; WA5MCR,83-05; WB5BBO,83-03.

Club facts for 1982. (1) We have 32 paid up members as of December 11, 1982,(2) The average attendance was 19 per meeting.(3) The club raised \$42.88 last year. (4) The club spent \$382.04 last year.(5) The club is in the black for \$39.84 net gain last year. (6) We have \$333.54 in the bank.

The Altus Area Amateur Radio Association conducted its last 1982 meeting on December 9, at the Emergency Operations Center in the North Main Fire Station. We had eight Hams and one visitor present. Those who were in attendence were N5AIP, WB5KRH, K9PNT, KA6RTX, W5ZDI, W5CCV, N5EOZ, WA5CHF, and Herb Haas.

Loren Simms, WA5CSF, the outgoing club secretary, was Acting President on the absence of Chuck Smith. Loren read thru a list of 'happenings' by calender date of the various functions we have had this last year. A summization of which is printed in another part of this months report.

Loren also gave a financial report of the club treasurery. The club took in \$421.88 and spent \$382.04 with a net gain of #39.84 for the year. We have currently \$333.54 in the bank with no outstanding debts.

A very short program , if you pardon the pun, was

presented on Computers.

The next item of business was conducting the elections for President and for Secretary-treasurer for the year 1983. Our new President will be Gary Alexander, KASMPK. Our new Secretary-treasurer is Bill Flattery, KASMTX. Both Gary and Bill share the pleasure of being 'railroaded' into office. We wish them best of luck for the coming year.

The next club meeting is scheduled for January 13, 1983 at 1930 hrs at the North Main Fire Station. CUL.

WA SCRE

Loren

Dear Club Members:

Thank you so much for your help and supmort you have given our club in 1982. Thanks for all the good times we have shared this past year.

73's

.....

WD5JNT Ted VanLaningham

The December Wheatstraw Christmas party and meeting got off to a good start the afternoon of Dec. 12, 1982 at Wyatt's Cafeteria with aproximately 40 members and guests present. Guests present included Mr C & E, Joq Harding WA5ZNF and his wife, Bob Ashby W5HXL and wife, Art Roberts, W1GOM and Jane, Charlie Greene WA5JGU and his wife. I hope I didn't miss anyone. Thank you for coming. We enjoyed your visit. We did miss the presence of several of our members who were absent due to illness Rosalie, WA5LZD is in Mercy Hospital. Ted WA5JNT is supposed to be sick in bed, but I bet Venus can't keep him down long enough to get better. Ralph and Geneveri were absent because she was not feeling well enough to get out. We all hope you all make a quick recovery.

Among other business that was discussed, we had our election of officers. As per usual, the railroad ran swift and straight down the track. Tom Johnston KA5FUU the V P moved up to president. For Vice President, we elected Leo Piel, WA5DUO. Ralph Wilder, WA5PFK won his old job back as Secretary/Treasurer. George Maschino

K5GGL was elected Club Reporter.

Someone volenteered Verlena Selby for net control this month. Since she doesn't have a license, that might mean that Ray, K5LLX will be stuck with it. Hope he can do as good a job as Rosalie got done last month when she was volenteered. Marvin had to fill in untill she was moved to Mercy Hospital when Johnny took over.

Last year Ted WA5JNT reported on our donation to the Crippled Childrens Hospital in liu of a gift exchange. He challanged and again repeated it last month for other clubs to match it with their favorite charity. This year we passed the hat again and we collected \$101 which is again going to the children at the hospital to help

them have a Christmas at the hospital.

Next meeting will be in Kingfisher Jan 9 1983. The location will be either at Peoples National Bank or at Pioneer Telephone Co. You will need to check in on the Wed Nite Net at 8:30 to find out which - or bring a radio along and call in. Someone usually brings a H T to the meetings. Schedualed entertainment for the Jan meeting is a film Bellingrath Gardens. It is a very good film on a flower garden at an old plantation mansion near Mobile Alabama. Welcome to come and see it. I hope everyone had a very MERRY CHRISTMAS and that you have a HAPPY NEW YEAR. George K5GGL

### AMATEUR RADIO EMERGENCY SERVICE

Art Roberts W1GOM Emergency Coordinator

NET - 34/94, OKC, 9 pm. Mon. In-Person Meeting - 3rd Mondays, 7:30 pm.

Scout-O-Rama

An event that has been traditionally assisted by Amateur Radio Operators is the Scout-O-Rama It is sponsored by the Last Frontier Council in this area to provide a show of scouting booths and displays spread throughout the "Made In Oklahoma" and "General Exhibits" buildings on the Oklahoma State Fairgrounds in Oklahoma City. It is logical therefore, that those Amateurs in scouting now, or those with scouting experience be volunteers in this public service event. We honor those ARES members who are also scouters who brought their handheld radios to the fairgrounds and stationed themselves where they could assist in communications to find lost children (or the reverse: lost parents) and be of service to the community.

We recognize the following amateurs who helped:

Stew Stewart KD5CL

Sid Rose WASTAR

Fred Taylor KA5CXW

Ron Tutor WA5GAM family

Ron St.Laurent KA5NVN and family

Bob White WB5PWZ

Other Amateurs dropped by to visit but didn't sign in and too numerous to remember all of them correctly.

We received a big "How" from the local scouting officials to ARES and MORI club members for their

efforts.

OKLAHOMA CITY AUTOPATCH ASSOCIATION, INC.

NEXT MEETING: 18 JANUARY 1983

The January meeting of OCAPA is set for Tuesday 18 January at 1930 CST. The usual Fire Department Training Center site on North Portland will be used.

I must apologize for the lack of a report for the December issue. I'm a creature of habit and a change in the schedule of things tends to throw me for a loop. The early bed-down of the December C & E caught me completely off guard. By the time you read this, the OCAPA Christmas party has come and gone, some of us may be planning a 1983 revenge for 1982's dead elephant, and most of us will be wondering how we can shed those holiday pounds. The early paste-up of this issue has precluded a report of the Christmas party but it will surely have been a great success.

On an even more tardy note, in November we had a fine presentation by National Weather Service personnel on the history of weather forecasting and information gathering. Our sincere thanks go to Ken Crawford and Neil Marchbank.

Speaking of weather, the February meeting will be the annual briefing for participants in the Central Oklahoma Severe Storms Warning Net. EVERYONE is welcome to attend, and encouraged to do so. Membership in OCAPA is not required for Storm Net participation,. but attendance at the annual briefing is highly recommended and desirable. Every year it seems that some changes are made to improve (we hope) the efficient conduct of the net. Failure of participants to attend the briefing results in inability to follow net procedures and discipline. This disrupts the net and delays the orderly flow of needed information, and could possibly result in injury or loss of life. Pass the word to your friends to attend the February weather meeting. Please come out and learn what is expected of all net participants.

The HF bands seem to be improving a bit lately.

WWV reported a Solar Flux of 279 on 11 December. Ten

meter band propagation was really hot for the 11-12

December contest. Virtually all rag-chewing was up

above 29.0. This winter will probably be the last big

28 MHz season until about 1987. Get it while it lasts.

After my comments a few months back regarding poor audio quality on many FM signals, I decided that I should finally do something about the excess audio problem with my ICOM talkies. The ICOMs present a special problem since no microphone gain control is included in the rig. Correction of the problem entailed addition of a resistor to the mike amp. I don't recomend this method for those with shaky hands or nerves. I may write this solution up later if time and space permit.

A different solution to the excess audio gain problem with the ICOM talkies is in use by N5CTT, K5SJV, and KA5BJS. They are using a commercial microphone made specifically for the ICOM rigs. This mike has an output level control which can be set to enable crisp, clean audio with very little background noise on the transmitted signal.

I hope each of you had a fine Christmas and that 1983 is a banner year in all regards.

Mac

Mac, K2GKK/5

### The South Canadian Amateur Radio Society

### AT LAST! A MEETING.....

Finally, after a couple of months, SCARS got together for a meeting. Actually, there have been two meetings since the last report, but more about that later.

During the November meeting, two important decisions were made. First of all, a new slate of club officers was elected to serve for the year beginning in January of 1983. They are:

Bill Oliver, K5KDR Bob Rabin, KA5MIZ Ken Neptune, KA5EFJ Gene Johnson, WD5GTC President Vice-President Secretary Treasurer

Congratulations to this fine group of new officers. We are looking forward to some good leadership for the coming year.

Also at the November meeting, the club moved to acquire a new repeater to replace the old one that is presently in use. As far as I can determine, that is about all that was done at the November meeting, however with the new list of officers and the repeater project, we certainly have something going to carry us into the New Year.

### SCARS HOLDS ANNUAL CHRISTMAS DINNER .....

On Friday, December 3rd, the South Canadian Amateur Radio Society held its annual Christ-mas Gala and/or Bash (I think Bash has been added to the FCC's list of "words too dirty to say on the radio"). A good time and Beef Stroganoff was had by all. The group gathered in the President's Dining Room at the OCCE in Norman for some before dinner visiting, and then sat down to a good dinner. I can hardly wait until next year.

### REPEATER NEWS.....

As of this time, a new repeater has been located, and a deal has been made. The delivery date of the machine and a date when it will hopefully be on the air have not been arrived at as of this time. The machine is currently in use by another metro area club and the timetable is somewhat dependent on the arrival of their new machine and the time required for acquiring new crystals and retuning their present machine to our frequency. More later.

### -wa5rpp-

### INDIVIDUAL NEWS.....

Jess, AF5X has a new computer. N5FBG, Linda has a new all mode 2 meter rig. W5QC, Jay Kelso is recovering from his recent illness.

W5SQJ, Jess has finished his new linear amp and is putting the final touches on it and putting it to the test.

### Q. R. Zedd

### ZEDD BACK FROM TIBET WITH RESOLUTIONS

The world's greatest DXer, Oklahoma's own Q. R. Zedd, was back in the comforts of Honor Roll Ranch last week after returning from a historic DXpedition to the remote mountains of Tibet.

Zedd, who in November became the first amateur radio operator to qualify for the DXCC Honor Roll on the new 30-meter band, reported he was weary from his exertions.

"It's a long way to Tipperary, but even farther to the part of Tibet where we operated," Zedd told us. "We chose Raowu, near Zongsong, at the mouth of the Xinjin Pass north of the Burma border because we had been to Dali before and that's old hat.

"We had to carry everything overland after the helicopter ride in from Hongchon," Zedd related, "and it was tough because of the high winds, snow and ice. We had only ten native bearers, which forced Tondelayo and me to carry our own logbooks and pencils."

The tiny expedition set up shortly before nightfall on the snowy side of Mount Urfufu. There, his Coleman making a cheery glow inside the orange nylon tent, Zedd sent out his first di-di-dum-dum-di-dit at 0400 Zulu on December 27. With Tondelayo Schwartz, his blonde, nubile, 19-year-old QSL secretary cranking the portable generator through the night, Zedd had by dawn worked 6,500 CW contacts, including 321 countries and N5ALG.

An avalanche, reminiscent of the one that killed his beloved father, Zepp Zedd, in Asia decades earlier, roared down the slope of Mount Urfufu a little before noon. Zedd and Tondelayo escaped, although their entire stock of Mounds bars was carried away along with a valuable cache of Coors. As it turned out, the Coors was not necessary because a scheduled rendezvous with Russia's greatest operator, Boris Badenov, did not materialize. Rumor has it that Badenov is in serious trouble with the Kremlin for being thrashed so badly by Zedd in the 1982 Radiosport.

Be that as it may, the avalanche was a bad thing, and was followed by more bad luck a few hours later when Tondelayo's Lilt home permanent froze to her head and she had to be carted back down the mountain to the local hospital.

Zedd, undaunted, worked on alone. Every news medium in the world knows by know how he helped out NASA with its space shuttle communications during a critical pass of the spacecraft on December 29, and how he worked a record 12,575 contacts in a four-hour period on New Year's Eve. What is not so widely known is that Zedd performed these peerless feats while going seven days without sleep and, in view of the avalanche, with only frozen coneys and Mars bars for sustenance.

"I believe any red-blooded, God-fearing radio amateur would have done the same under the circumstances," Zedd said modestly. "It is only a minor chapter in the story of my greatness."

When the great blizzard of January 1 totally wiped out Zedd's base camp, as we all know, he did manage another 450 QSOs by keying an MFJ clock borrowed from WA5MLT. But fate had dealt the expedition its final blow, and Zedd retired to lower altitudes where he found Tondelayo much improved, and most of the frozen rollers removed from her scalp.

"It was a glorious last night in Ranchapoor," Zedd recalled with a fond smile. "Tondelayo and I went out on the town, and danced till dawn while feasting on raw yams

Continued on next page.

December 5, 1987

Dear Cora:

I'm writing this letter to commend a group of amateurs in Oklahoma City who went out of their way to assist me on the morning of September 24, 1982.

While traveling West on I-240, I encountered a large log in the middle of the right lane. I tried to dodge it but wasn't able to since

it all happened so fast.

The log ruptured the gas tank, and tore the tail pipe loose. I stopped on the shoulder and cut the engine off. After getting out of the car, I got on the 34/94 repeater and put out a call for landline assistance. K5LDI came on first and called my home and my Dad got a AAA tow truck out. N5EDT and K9JTW came on shortly afterwards and stayed on with me till K9JTW picked me up and brought me home.

Tom called me at home and said the car was picked up and would be home. Also the wrecker driver told me that Vernon was watching the car till he arrived to pick it up, as the gas tank had to drain out completely before it could be towed.

For all the services rendered by these three outstanding gentlemen, I wish to express my utmost gratitude and hope I can be of assistance to them some day.

Also, my thanks to any other amateurs who may have tried to assist me on two meters.

Yours truly, Linda Brandt N5DWN

### ZEDD IS BACK

and burned goat. A mystical Asian moon hung low over the cloudy mountain horizon, and I would be a liar, sir, if I did not admit to you that my romantic nature was deeply touched. Tondelayo and I did not part until dawn, when I wended my romantic way back to my suite to work a few hours on my Heathkit weather station kit."

As for Tondelayo, the darling girl was found lolling in the eighty-foot hot tub that adorns the play room at the back of Zedd's ranchhouse and doubles as a cooling tank for his dummy load.

"It was real nice," Tondelayo said, and gave us an unreadable yet fascinating look. "That darlin' Q. R. was jus' ADORABLE on the whole trip, an' it was just so fun... an' neat... an' ROMANTIC, doncha know!"

Only inate good taste prevented your reporter from pursuing this line. There have been increasing rumors in recent months that Zedd and Tondelayo may actually be, shall we say, approaching a state transcending employer and employee, DXer and secretary.

Certainly we would like to have the truth about this situation. Zedd has never married, if one discounts his annulled liaison of a few years ago with an unsympathetic wench who could not understand that DX comes first. Half the prettiest women in the world, not to mention several ladies who knew CW and held the Amateur Extra license, have tried to capture him. If Tondelayo were to get him to the altar, it would be the biggest news in ham radio since W2NSD/l flunked the GRE.

Alas, the rumors are only that at the moment, rumors. Tondelayo continues to work selfles ly at Zedd's side in a relationship as pure as the driven snow. For his part, Zedd is deeply engrossed in new antenna designs as well as plans for Field Day 1983.

If there is something to these stories of possible romance, we will have to wait further to learn of it.

nay

COUNTY ARC

MARSH WASUBO

They always say that the third time is the charm, so after the second start to write an article for the C&E, this one might even make it to the printers.

Activity here has been kind of slow but will try to hit on the high points for the last few months or since the last article I got

finished and down there in time.

The Novice class is over except for some of the written tests to come back. I think we will have 6 or 7 new Novice in Kay County. Hope all of them keep with it and get on the air soon, keep increasing their code speed so they can upgrade while it is still fresh in their blood. Thanks can be passed out to Dave, KD5FX and Vern, N5ANV for taking the time every Tuesday evening for the last 8 weeks to run this class.

The November meeting was held at the Red Cross in Blackwell by 10-12 members. It was not a standard club meeting but a Red Cross Meeting. The members did not gain the information we planned to for we were kind of misinformed on the subject of it. They are fully aware of the services that the club can provide them with. We-(the hams in Blackwell) are seeing if we can't get some antennas up at the Red Cross so if need be we can set up at that location if needed.

While on the subject of Blackwell, for those that didn't know: N5ANV has a repeater on the air that is sounding real good now. The input is on 144.63/output 145.23. The antennas aren't up too high at the time but mobile range is about 15 to 20 miles, so try it you might like it.!

While on repeaters the P. C. machine, as you are aware, has had some noise problems with it that like to go away when the cover is removed to check on it. This past week we think we have quieted it down and the Mfd. problem in the IDer has been cured so it won't talk so much.

Other topics at hand: The December meeting will be a dinner meeting and it looks like there will be a good crowd to eat, be merry and swap DX lies.

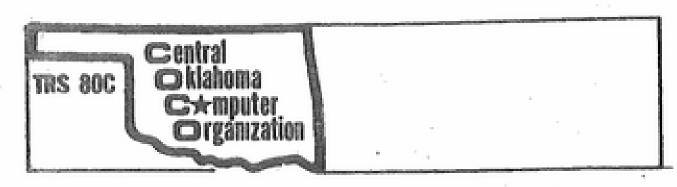

The Club caps are in and if you haven't got yours yet Please do so, so the money can be put back into the club treasury to pay bills at hand. They are \$4.15 each for summer or winter type.

The New Year will be coming in soon and so will the '83 club dues, so bring your checkbook to the January meeting. But don't let that scare you off for I hope to have a Real Good program for us that month so check into the Monday night net and keep aware of current happenings.

Couldn't find a sweet little secretary to type this or check the spelling, so my fingers are about to give out and my brain has for

> Till next time 73 Marsh

COCO--Central Okla. Computer Organization
This is our first issue of the C&E so it's
appropriate that Amateur radio operators know
something about us. First let me introduce
myself" Holly-N5ABL, CHAIRMAN of COCO"
althrough I am a ham and many of our group are
also hams, today I address you as a computer
owner.

Our club is about one hundred plus strong and for the most part own TRS-80C (Color) Computers. We meet once a month at the RED CROSS BUILDING, this is normally the first Saturday of each month, at TEN AM. But— the first Sat. of January falls on the FIRST and fearing attendance may be off due to difficulties in getting out of bed, the meeting has been moved to the second Saturday. While we are talking about the RED CROSS BUILDING let me take time to thank the Red Cross people (Tim Sartarius) who have so kindly allowed us the use of their building as a meeting place. They have been great to us and many ham clubs as well.

Our purpose is much the same as any other club, group or society. The gathering together of people with like interests, the advancement of our hobby and to learn from others more

knowledgeable than ourselves.

Many times this past year I've heard "Why would I want a computer, it can't do any thing for me?". Well, BELIEVE IT OR NOT you most likly already own one! New Cars, microwave ovens, TVs, stereos, radios and yes even Ham rigs use as their brains a computer. It is just one more step to get one with a keyboard so you can do something with it. Our little COlor COmputer has already been taught to send and receive CW and RTTY, to send code practice, balance the checkbook and EVEN PLAY GAMES. I'm writing this using a word processor program and my COlor COmputer. Now if I only had a program to check my spelling. The most compelling reason to own a computer is the kids. Tomorrow's children will be as comfortable with computers as you and I are with TV. The final line is the sooner my child starts learning computers the farther ahead he'll be of those who know not the world of computers!

PRODUCT REVIEW: KANTRONICS 'INTERFACE' and Kantronics 'Hamsoft' Software packages. Recently we purchased the Kantronics CW-RTTY package to mate with our TRS-80 Color Computer and HF ham station. We shopped the market and it appeared we had only two choices when it came to CW-RTTY with our computer. Several hams in the Oklahoma City area have had great success with the Clay Abrams software matched up with a Flesher terminal unit. We thought we would try something different, thus the call up to Lawrence, KS for a try at the new Kantronics system, which consists of a terminal unit (The 'Interface') and computer software for whatever computer you may own. The system is currently available for TRS-80 Color and Model III, Apple, Atari and Commodore VIC-20.

The TRS-80 Color software comes in the form of a PC board which plugs directly into the cartridge port of the computer. I asked the folks at Kantronics if they intended to make this program available in disk (or cassette) form for the Color Computer. The answer was, "Not in the immediate future", so we CO CO users are limited to the plug-in software at this time.

The interface connects to the CW Key, Speaker, Microphone and PTT of the transceiver. It then connects to the computer via the software PC board by way of 4-conductor shielded cable. Complete wiring should take less than an hour.

I had to make some minor modifications to the Interbace to allow it to operate AFSK with the

ICKM 720A mic input circuit. ( Icom users all know that the mikes are preamplified with some really strange levels and impedances.) After all was done, I fired up the TRS-80 and made my first RTTY QSO with relative ease...

#### "KANTRONICS INTERFACE"

Specifications: RTTY Receive: Active filter - 2995 hz, 180 hz bandwidth. CW receive: Active filter, 750 hz bandwidth. RTTY Xmit: AFSK, 2295 hz space, 2125 hz mark, shift off mark to 2175 hz for CW-ID. CW transmit: direct or through buffered key. Power requirements: 8 to 15 volts DC, minimum 150 ma. Size- 2 1/2" x 5" x 5 1/4".

#### "KANTRONICS HAMSOFT"

Each software system is of course tailored to the specific computer for which it is designed. Thus, some of the features for the CO CO may be different on the Apple, Model III or VIC software. However, the CO CO version offers Morse Code send-receive 5-99 WPM (the faster the better!), Baudot at 60, 67, 75 and 100 WPM, ASCII at 100 and 300 baud, split screen display, 1,024 character transmit buffer, automatic morse speed tracking, morse ID during RTTY/ASCII, ten message ports (1,024 characters each) and compatability "with any Centronics-type printer with appropriate parallel interface." (More about that later...)

The entire software package is controlled with nine simple control commands which consist of the up-arrow key and a designated letter key. The control command are clear, logical and easy to remember. The CW abbreviations most often used are also represented on the keyboard by use of designated key ( \$ = % & # +, etc.).

Kantronics has developed a very useful system for hams and computer owners who might become interested in RTTY short-wave listening. The software is backed by a 90-day limited warranty and a friendly attitude at the Kantronics' customer service desk. ( I called them several times during the past few weeks and they have always been willing to listen to my questions and offer intelligent solutions. How refreshing!

The only problem I have experienced has to do with the printer interface, which is still not up and running. My printer is the Radio Shack DMP-200 and unfortunately a schematic of the parallel interface is not included in the owners's manual. When I wired the interface to Centronics standards and attempted to print hard copy RTTY...you guessed it, nothing happened! Right now I am in the process of swapping printers around with other hams in order to determine if the problems lies with the Hamsoft or the DMP-200 interface. (As you can tell from this article, the printer works fine with the serial interface!

A slight inconvenience of the Hamsoft software is the inability to store your ten message ports on tape or disk. Every time you turn off the computer, you lose your messages. A "bragtape" or storage output would be a meaningful improvement to this excellent program.

If you have any questions about the Kantronics system, I would be pleased to hear from you. I can be reached at my address (see C.O.R.A. roster) or at the monthly meeting of C.O.C.O.

Best wishes for a Merry Christmas and a Happy New Year! De AD15.

The U. S. Army has a lot of new "weapons".

+++ A guided-missile-carrying dune huggy.

+++ Mini-missiles that can be sown from
aircraft.

+++ Laser-guided missiles.

+++ A mini-computer, to facilitate rapid communications and enemy analysis on the battlefield, purchased - of all places - from civilian retail outlets because of learning ease and simplicity of operation. Starting with this issue of C&E the Color Computer Group will submit minutes of their monthly meeting and various articles written by The purpose of the club is to band together those people who have a common interest in computers. Object of the monthly meetings are to exchange ideas and conduct sessions on hardware and software. Ham radio and computers go hand in hand. 1982 officers are: Chairman, Holly Holcomb, Vice-Chairman, Bob Pace and Secretary/Treasurer, Bill Wright. All are also hams.

MINUTES of DECEMBER 5, 1982 MEETING The meeting was called to order by Chairman Holly Holcomb at 10:00 am at the Red Cross Center, 323 NW 10th (Back door) OLD BUSINESS: Holly discussed the COCO request join CORA. The constitution of CORA specifically states CORA's purpose-"the purpose is to promote radio amateurs aming the RADIO CENTRAL RADIO AMATEUR community." Consequently, coco can not officially affiliate with CORA until constitutional differences are worked out. Joe Harding made a motion to take advantage of a special group \$3,00/year/member rate for of Seconded by George Adkins, subscriptions. motion carried. Forty-four present consisting . of 17 hams and 27 non-hams paid their dues, which has been established at \$5.00/year. Motion was made and seconded to move the January meeting to the second Saturday because of the holidays. Motion carried. was made to establish a nominating committee to recommend candidates for the 1983 officers Ed Beltram, seconded by Dave Boneau. Motion carried. Nominating committee consists of Ed Beltram, Dave Boneau and George Adkins. Does that tell you anything? NEW BUSINESS: Bob Langmacher gave the group an The update on P.A.T.E.N.T. program January will be on the 6800 BulletinBoard and will feature a modem set-up. Bob Pace talked about the availability of used Shugart disk drives, SA400L for \$105 and SA450 for \$145 from Rondure in Dallas 214-630- 4621. HARDWARE: Rumor has it that Radio Shack will introduce a new 16K-64K Color Computer. CLASSES: Basic programing was continued Jack Cochran and FLEX by Bob Graham.

> Bill Wright Secy/Treas.

SEPTEMBER AMATEUR RADIO ISSUE

Usually you can count on some good articles in the VK-land magazine Amateur Radio. The September issue confirms the validity of such expectations.

Its three highlights are (1) a detailed article on radio operation from Willis Island, (2) a complete round-down on the FT-One transceiver.....very good indeed, and (3) an article on radiotelegraphic operation, this latter limited by the slight difference between US and VK procedure.

As customary, the issue will be in the ACARC clubroom.

CO-LOCATION PROBLEMS ANALYZED

The October issue of AMATEUR RADIO has an extensive, even exhaustive, treatise on the problems and possible solutions relating to interference between VHF stations closely located. It was reprinted from "Australian Electronics Engineering."

The issue has a second part to its series on effective radiotelegraphic communication.

It's a matter of interest to note that AMATEUR RADIO reprinted three articles from the C&E in that October issue!

### CORA COMMENTS

The November 1982 meeting was called to order on the 23rd at 7:44 pm by the delayed President Ted VanLaningham WD5JNT in the chair with 11 Directors and four guests representing six clubs in attendance:

Aero.Center: Don Rooker K5SJV
Hollis Holcomb N5ABL
VHF Club: Fred Taylor KA5CXW

Paul Asplin WA5HTL MORI: Jim Buswell N5BEQ OCAPA: D.C.Macdonald K2GKK/5

Reggy Joe Whited WN5NWX Art Roberts W1GOM

76ers: Dale Moore KD5SX Wheatstraw: George Maschino K5GGL

Ted VanLaningham WD5JNT
Visitors and Alternates - Joe Harding WA5ZNF,
Editor, The Collector and Emitter; Kathy Whited
WB5NDO, OCAPA Alternate; Sue McGlynn N5CTT and
Jane (Mrs Art) Roberts.

Additional copies of the Constitution were provided those who lacked them. Copies of the minutes of the October meeting were provided each Director and guest for review. It was duly noted that the elevation of any Director to the Office of President leaves a vacancy among the representatives from his/her club and denies a vote except in the case of ties as is customary with the Office. The Chair entertained the motion, seconded by Mac K2GKK/5, and it was passed that we accept the minutes as corrected.

Mac K2GKK/5 moved, Don K5SJV seconded and the motion passed that the Treasury report from George K5GGL Treasurer was accepted as presented

Copies of CORA's letter to the ARRL in support of George Adkins AD1S to succeed as an interim SCM to fill the current unexpired term were distributed to each attendee.

Don K5SJV Chairman of the Facilities Committee for Ham Holiday '83 (#10) reported their efforts and findings: the Omniplex, Quality Inn Holiday Inn NW, Hilton Inn W., Sheraton Century Center and Park Suite Hotel are each too small for our needs; the Hilton W. could not provide us the date; the available buildings at the State Fairgrounds would require too much "set-up" for our use. Therefore, he moved, Mac K2GKK (portable 5) seconded and it passed unanimously to return to the Myriad. Discussion of the Banquet and Dance (if any) were left to the Facilities Committee to work out the details.

On motion by Fred KA5CXW and second by Mac K2GKK/5 it was unanimously voted to table much discussion about details regarding dealers and flea-market set-ups and fees. Consensus could not be reached regarding charges for flea market tables and the like.

The Publicity Committee (W1GOM) requested that CORA consider funding a special edition of The Collector and Emitter to be sent to all the known and likely Computer Dealers.

Mac K2GKK/5 moved, Paul WA5HTL seconded and it passed unanimously that Joe WA5ZNF swap one of our previously-used manual collators for a "hot-wax layout machine" for the <u>C&E</u>.

Much discussion followed but unresolved about the joining to CORA of COCO (Central Oklahoma Computer Operators). Mac K2GKK/5 moved Art W1GOM seconded and the motion passed unanimously that Joe WA5ZNF will provide mailings of C&E's to contributing organizations that are otherwise non-affiliated with CORA at the rate of \$3.00 per member of that organization.

Since there would be no meeting in December due to its otherwise proximity to Christmas Day, it was announced that the next meeting would be the normal, fourth Tuesday in January, the 25th. 23 November 1982 N5BEQ, Secretary

### EC ASKS FCC TO DELAY NO-CODE NPRM

The ARRL Executive Committee met November 20 at Hq. and held wide ranging discussions on a number of topics of interest to members. The Committee instructed the staff to ask the FCC to delay issuing its long anticipated NPRM on the No-Code License for 18 months. The Committee feels that adding an additional license class at this time would serve to compound any problems associated with transferring the administration of testing from the FCC to the Amateur community.

The staff and Counsel were also instructed to draft a petition asking for a change in licensing terms from five to ten years (see story elsewhere in this issue). ARRL will file comments on ARRL's Volunteer Examination Proposal, RM-4229 (Vol. 1, No. 1), seeking to clarify a few minor points. ARRL will also comment on FCC's Logging NPRM, Docket 82-726 (Vol. 1, No. 2). It is anticipated that these comments will support the relief proposed in the NPRM but will suggest retaining some form of record keeping for international thirdparty traffic. The staff will await input from the membership before filing comments on the power measurement NPRM, Docket 82-624 (see Minute 60 of July 1982 ARRL Board meeting).

The EC also received and discussed a report from Attorney Jim O'Connell, W9WU, who is representing a group of amateurs who have filed suit against the City of Burbank, IL. Earlier this year, Burbank adopted a restrictive ordinance against Amateur Radio operations within the City, imposing, among other things, a moratorium on all new Amateur antennas. According to O'Connell, the judge hearing the case has allowed Burbank to file a late response to the Burbank amateurs' charges that the City has violated their constitutional rights. The League's Counsel and the Hq. staff will continue to monitor the situation and lend research and other assistance, in addition to the financial assistance already approved by the EC.

The EC also discussed several "tower"

cases. The ARRL Legal Counsel, with the assistance of the Hq. staff, will file amicus curiae (friend of the court) briefs in cases involving Dr. Harvey S. Ellis, WD8BCM, of Farmington Hills, MI, and Charles Guschke, N5SW, of Oklahoma City, OK. The brief in the Guschke case will be the second League filing to date in that litigation and involves permissible antenna heights. The Ellis case involves the question of the propriety of amateur operation in a residential area.

The EC approved a formula for funding the new section-level Field Organization calling for an annual budget of \$0.75 per member with a minimum of \$750 for those sections with fewer than 1000 members. The General Manager was instructed to prepare a proposal, including ways of raising the estimated \$50,000 needed, to produce a new Amateur Radio film. The film, according to Roy Neal, K6DUE, who developed the concept, will be oriented towards "youth and space."

The status of the League's efforts to resolve the cable TV interference (CATVI) problem was reviewed briefly. An FCC official has been quoted as telling an audience of CATV engineers that the industry is close to losing access to Channels E and K if it does not do a better job of resolving interference problems with Amateurs. The EC expressed hope that this comment reflects the prevailing FCC attitude toward the ARRL petition, RM-4040.

### WARC-79 -- FCC Acts

At its regular meeting November 18, the FCC adopted an NPRM in General Docket 80-739, which is concerned with the implementation of the final acts of WARC-79. The discussion, heated at times, centered around the conflicting interests of broadcasting and the land mobile service. At this time, it is not known what impact this will have on the Amateur Service. ARRL expects a delay of a few weeks before the text of the NPRM is issued.

Where, Oh where has OK-DX gone? Not only did we miss last month's meeting, but the 'DX Correspondent' also missed last month's deadline for the C.& E.! Apologies to editor Joe Harding and BOTH MY readers! Please blame my lapse of memory on the temporary insanity caused by a week-long business trip to Hartford, Connecticut. Something good came out of the trip however, as we took the time to visit A.R.R.L. Headquarters and WIAW. I don't care what those guys say...they MUST run ten kilowatts to have that kind of signal! (Actually, they DO run 10 KW, but not all on the same frequency!!) Our friends at S.M.I.R.K. would have loved the old JOHNSON tranmitter used to send the six meter bulletins...it was sitting on a chair next to the main tranmitter racks... Really, I thank the friendly folks at 'H.Q.' for their hospitality. It's quite an operation. Anyway, I made it back in time to type this

Anyway, I made it back in time to type this month's article on the 1982 Christmas present, a TRS-80 Color Computerand Radio Shack DMP-200 Printer. What a far cry from the IBM typewriter and gallons of correcting fluid that have been my nemesis since lovely 'Vicki-San' changed jobs and no longer can type our monthly blurbs! I am quickly getting spoiled by the computer's instant editt...(?) er,eddit...er, EDIT!! You know what I mean.

Forgive me if I show off the special type...

#### NEXT MEETING

The first meeting in 1983 will be held on January 10, 1983 at the Waterhole Restaurant, 3333 N.W. Expressway (across from the Baptist Medical Center), Oklahoma City. The festivities usually start around 6:00 PM and continue until everybody leaves to watch Monday Nite Football! There is no 'business' meeting...just info on the latest happenings in DX. Everyone is invited, whether you have worked 30 or 300...

### ON THE BANDS

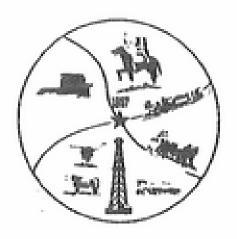

FOO-Clipperton island is still rumoured to be coming up if a group of french polynesian operators can get transportation with the French Army. Permission must be granted from Paris, so look out for 'red' tape, no pun intended...('red', get it?)...didn't think so. BY-China has a third station up and running, in the form of BYBAA, recently heard around 21.048 Mhz near 0100 UTC, listening up & down. TT-Chad has apparently been delayed due to sudilness of TL8GE, who says he still plans the trip to sunny Chad...perhaps as early as this coming week.

YI-Iraq has been showing up with the 'Arabian Knights group on 14.220 or 14.250 Mhz on friday an saturday nights. The call is YI1BGD, a far liar call to many DXer, but a difficult QSL to obtain! (Ask N5IH) He is being run by JY3ZH and his comrades starting about 0500 UTC. 3B-Rodriguez Island is expected up by 3B9DA near the end of December. I have no other information at this time.

Thanks to KC5CR for bringing me up-to-date on the latest DX gossip which came up during my absence to the frozen wastes of Connecticut.

We should have lots to talk about in January, due to the expected appearance of TWO DXpeditions to VKO-Heard Island scheduled to appear in late January or early February, 1983. Beside the excitement about VKO, there are lots of other goodies coming up in early 1983. We have an early deadline on this issue, so won't bore you with news that will be old by the time you read this Christmas edition. I hope everyone had a successful time during the

(EDITORS NOTE: The following letter had to be left out of last months issue due to an awful problem with space. Joe, WA5ZNF)

City of Woodward

November 12, 1982

Great Plains Amateur Radio Club Mr. Bill Wyatt

Dear Bill:

Today I was informed by the Fire Department that the services of the Radio Club had been very beneficial to the City yesterday in the protection of life and property. The instance I'm referring to is the gasoline spill which happened in the northeast part of the City and the club participated with City personnel in making the area both safe and secure.

Please make your club members aware that their services are important in many ways and we are appreciative of the time and effort they expended in assisting our workers.

We look forward to working with you in determining other ways this cooperative venture may make our City a safer place to be.

Sincerely,

Callawan

Edward E. Dawson City Manager

More OK-DX

ARRL 10-Meter Contest December 11-12,1982. I especially hope that all of our deserving members worked the 1A0KM (Knights of Malta) station that has eluded so many for so long... A few of our Honor Roll members in OK-DX only lack the 1A0KM for a 'clean sweep'! (Yes, that means they have worked EVERY DX country in the world!)

How about the new 30 Meter band? Mike Salem scooped everybody last month with his timely article about the new band allocation. We immediately fired up our IC-720A and KLM Log-Periodic antenna and worked into Europe as easy as falling off a log...lots of CW and RTTY activity...the band was really alive! As Mike reported, power is limited to 250 watts and we are limited to operation on a non-interference basis.

If Joe Harding has the space in this issue, Vicki and I have submitted some photos of our recent DXpedition for your perusal. The black & white photos don't do justice to the beauty of Micronesia, but we hope you enjoy the pictures anyway. The QSLs from the trip have been delayed from the printer, so if you are waiting for a QSL from KC6WS, KX6OS or AD1S/KHØ, please be patient. See you at the next meeting of OK - DX.

### MERRY CHRISTMAS
